The Conclusion

## About US

Enkedo Route formed 2011, a multinational company specializing in the development and construction of specialized buildings, project evaluation, and consulting services for international companies. Our commitment is to provide our clients with integrated, cost-effective, and high-quality solutions and services.

Our journey began in Jordan in 2010, where we established ourselves as an IT and Network Service Company. To facilitate our expansion into Iraq, we established Enkedo Route for General Trading, Training, and Development as our operational company within the country.

With our progress and the increasing opportunities in Iraq, we formed the Iraq Branch, “International Experts for Engineering Contracting,” in 2017. This branch specializes in providing consulting services to all international companies interested in working in Iraq.

In response to the growth of our projects and clientele, and to increase the scale of our projects, we established the Turkish Branch, International Experts for Engineering and External Trading, in 2023. We look forward to continuing our growth and serving our clients with excellence.

## Our mission

Enkido Route Group is dedicated to construction projects, engineering, project analysis, solar energy, public relations, and corporate marketing. Our expertise lies in developing and customizing business applications to meet our clients' specific needs.

We are committed to enhancing community services and support by contributing to multiple projects directly related to community needs. This includes, but is not limited to, housing, industry, supporting international companies operating in Iraq, facilitating international investments in Iraq, and others. Our ultimate goal is to help create more job opportunities through expanding projects or facilitating the entry of foreign companies by providing integrated services to them in the field of government or investment projects, as this increases the opportunity to transfer expertise to Iraqi cadres by working with international expertise in these fields. Projects.

OUR  
VISION

## Our vision

We are committed to creating a safe and prosperous world by meeting the needs and aspirations of all businesses and individuals. With whom we work to build an integrated world of services in various fields and the requirements of daily life, as our company specializes in building, maintaining and managing renewable energy systems and providing their requirements, whether from solid global platforms or through cooperation to transfer technology, as we are working to establish the first factory to produce solar panels in Iraq with German technology. The production line was built and manufactured in cooperation with a specialized German company, and the construction of buildings in western Baghdad was also initiated, where it is hoped that all work will be completed and production will begin in the third quarter of 2025. The company has also begun establishing a line to assemble components of other solar energy systems according to the (SDK) system with a number of leading international brands in the field of solar energy, where it is hoped that work will begin and production will begin at the end of 2025.

We are dedicated to ensuring the success of our clients' projects in Iraq by providing first-class services, advice, public relations and high-level local services.

We are dedicated to being part of the new development era in Iraq by actively participating in construction projects across the country.

## Our Service

**Our company offers a variety of services tailored to meet the specific needs and locations of our clients. These include, but are not limited to:**

**Solar Energy:** We provide a wide range of services in this field, such as supplying station components, installation, operation and maintenance, and we hope to soon begin manufacturing solar panels and other components.

**Investment in housing projects:** The company owns a number of projects in the governorates of Diwaniyah, Dhi Qar, Anbar, and others. It also works to provide services to foreign companies working in this field through consultation, marketing, project management, and supervision of implementation.

**Project Management:** The company provides project management services on behalf of local or foreign companies in the fields of energy and contracting due to its accumulated services in these two fields spanning more than 14 years.

**Training and development:** The company has a number of experts specialized in training in various fields, including engineering, technical, and scientific.

**Consulting services in Iraq:** We have extensive experience in project and grant management. We specialize in selecting successful projects, preparing tender documents, developing pricing systems for tenders, and submitting offers in accordance with Iraqi laws to ensure successful participation.

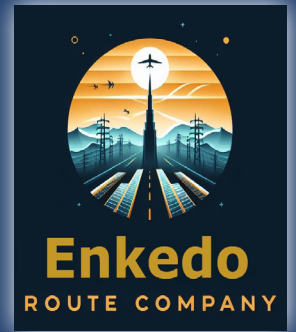

**Local Services:** We provide a variety of local services such as public relations, customs clearance, local transportation, and security through our partners and clients. Our goal is to ensure that our clients' operations run smoothly in all aspects.

# Solar Energy Projects

**3rd Sector / Ministry of Interior / Border Department**

## Solar Energy

**Solar energy** is becoming increasingly popular as the world takes notice of the burgeoning carbon emission problems that come with burning fossil fuels.

**Enkedo Route** an Iraqi company that provides solutions to the energy reality in Iraq, keeping in mind the slogan of clean energy as an irreplaceable option for the economic advancement of Iraq and solving the electrical energy crisis that has burdened the Iraqi citizen and the industrial sector alike, by providing the best and most appropriate solar systems in proportion to the climatic conditions. For Iraq, it is one of the best international facilities at the most reasonable prices, providing a specialized staff in installing and maintaining these systems with real after-sales guarantees, and holding educational courses to educate the Iraqi street about the benefits and uses of clean energy, in addition to sponsoring scientific conferences in this field.

**Enkedo Route** signed a partnership with Military Industry to construct a Solar Panel Production Line in Yousefian (South of Baghdad), the production line shall produce 200MW of solar panels, Invertor and other requirements for the Solar Projects., the factory now under constriction, and shall start production on January 2025.

## Al-Anbar Health Department Solar System Installation

<b>Project Location</b>	<b>Al-Anbar Governorate</b>
<b>Contract Value</b>	<b>290,000,000 IQD</b>
<b>Solar System Details:</b>	<b>Power Size: 120 KWHp Storage: 100 KWH Gel Deep Cycle</b>
<b>Contract Date</b>	<b>June 2023</b>
<b>Project Execution Duration</b>	<b>5 working days</b>
<b>Additional Information</b>	<b>Training provided to 3 staff members on system operation and maintenance.</b>

## Arabic for Food Distribution Company in Uarij

<b>Project Location</b>	Baghdad Governorate
<b>Contract Value</b>	90,000 USD
<b>Solar System Details:</b>	Power Size: 40 KWHp Storage: 120 KWH Tubular Batteries
<b>Contract Date</b>	August 2022
<b>Project Execution Duration</b>	10 working days
<b>Additional Information</b>	Includes a service contract for maintenance (250 USD/month) covering cleaning, upkeep, and calibration.

## Akapee Farm in Alrashdiyah Sector

<b>Project Location</b>	<b>Baghdad Governorate</b>
<b>Contract Value</b>	<b>105,000 USD</b>
<b>Solar System Details:</b>	<b>Power Size: 60 KWHp Storage: 150 KWH Tubular Batteries</b>
<b>Contract Date</b>	<b>February 2024</b>
<b>Project Execution Duration</b>	<b>10 working days</b>
<b>Additional Information</b>	<b>Includes a service contract for maintenance (200 USD/month).</b>

## Ministry of Interior / Border Department / 3rd Sector

<b>Contract Value</b>	<b>270,000,000 IQD</b>
<b>Solar System Details:</b>	<b>36 systems installed Power Size: 5KWHp Storage: 20KWH GEL Deep Cycle Batteries</b>
<b>Contract Date</b>	<b>June 2023 to December 2023</b>
<b>Project Execution Duration</b>	<b>3 working days per system</b>
<b>Additional Information</b>	<b>One-year free maintenance service contract included.</b>

# Contracting Projects

## Contracting

**International Experts for Engineering Contracting** was established in 2017 as part of the **Enkido Road Group**. A company has been approved as an operating company on behalf of the group as a company specializing in the field of construction and engineering, including general contracting, consulting, design and construction, construction project management, and services.

## The Conclusion

The previous details demonstrate the experience and competence of our company in the field of solar energy and contracting projects by dealing with modern engineering techniques in a variety of implementation areas.

Our staff is qualified in the field of executive project management and has advanced experience in the field of engineering planning and safety at work sites, in a way that distinguishes them from other contracting companies. The company is proud to have recorded no work-related injuries.

Among our other services is training, and we do not have space to present them here because they are closely linked to the type of projects implemented by the company, each of which has its own requirements as well as the customer's requirements. Our cooperation with international companies in the field of consulting and development inside Iraq requires us to design special training programs that suit the requirements of the projects. Which is implemented by these companies, and the company's staff, despite all the experience they have accumulated in the fields of solar energy, engineering contracting, or technologies, are keen to develop these experiences and share them with the rest of the team members.
